# Day 4
Dynamic Frontend Components - FURINO

This report provides visual evidence of the successful integration and functionality of dynamic features within FURINO's frontend. The screenshots demonstrate key aspects of the platform, including dynamic product listing, detailed product pages with proper routing, and building a functional cart for managing orders

Self-Validation Checklist for Frontend Development

Frontend Component Development ✓ ✗
- ✓ Dynamic product listing
- ✓ Product detail page functionality
- ✗ Category filter component
- ✗ Search bar functionality
- ✓ Cart functionality (add/remove items)
- ✗ Checkout functionality
- ✗ Login/SignUp Page

Styling and Responsiveness ✓ ✗
- ✓ Responsive grid layout for product listings
- ✓ Consistent UI design across all pages
- ✓ Mobile responsiveness

Documentation and Submission ✓ ✗
- ✓ Clear documentation for each component
- ✓ Steps for setting up and running the application
- ✗ Code comments and explanations
- ✗ Submission before the deadline

Code Quality ✓ ✗
- ✓ Modular and reusable components
- ✓ Clean and organized code structure
- ✓ Proper use of state management and data binding

Final Review ✓ ✗
- ✓ All functionality tested (products, cart, checkout)
- ✓ UI/UX reviewed for user-friendliness
- ✓ No bugs/issues identified in the development
